

HETAS H002

Solid Fuel & Regulations Standards

Price:	£450 + VAT
Duration:	2 Days
Code:	H002

Who is this course for?

Suitable for retail showroom staff, building surveyors, building control officers and architects, wanting to develop their knowledge of solid fuels and biomass to remain updated with all current Building Regulations and standards.

What are the aims of this course?

The course aims to offer information on the regulations, standards, legislation, appliance sizing and pre-installation survey considerations. As well as the dedicated HETAS Approved Retailer course, H002 provides an alternative route for retailers to gain the criteria necessary to join the HETAS Approved Retailer scheme.

What are the prerequisites?

Applicants to the H002 must have first completed and have certification of HETAS H001; alternatively, candidates should have experience in the solid fuel industry or construction-related profession.

What subject areas will this course cover?

The course includes the following topics:

- The makeup of a wide variety of solid wood and mineral fuel
- The concepts of heating with solid fuel, wood and biomass
- Regional variation of Building Regulations
- Distinguishing between different types of appliance chimneys, flues and terminals
- Ascertaining which appliance is suitable for which installation
- Air supply and ventilation

What assessments are involved?

The course will conclude with a theory assessment based on the information provided throughout the course. This is a one day assessment.

What do I need for this course?

All training manuals, technical handbooks and certification fees are included in the course fee. For the candidate application and registration process you will need your National Insurance number and a passport sized photograph.

What status do I receive if I pass the course?

Successful completion of this course is certificated by HETAS and provides a route to application for registration as a HETAS Approved Retailer.

*The H002 is not on Waxman Training Academy's standard HETAS course calendar, however, is available for candidates wishing to sit the course. Please enquire for further details and to book.
